CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This is one of a series of reports prepared in connection with the 1935 Census of Business.

Data for the various phases of the Business Census were compiled by the Census Bureau from information collected in 1936 in a field canvass of business establishments in every State, city, and county in the United States. Funds for the Business Census were provided by the Works Progress Administration.

Population and farm population statistics for 1930 presented in this report are from the Fifteenth Decennial Census of Population; statistics of manufactures are from the Census of Manufactures for 1935; and farm population (1935) and farm personnel statistics are from the Census of Agriculture for 1935.

This report was prepared by Ralph C. Janoschka, Chief of the Service Division, assisted by Albert A. Eisenstat.

PERSONNEL AND PAY ROLL IN INDUSTRY AND BUSINESS, AND FARM PERSONNEL, BY COUNTIES

INTRODUCTION

This volume presents a summarization by counties of employment, pay roll, and proprietorship data, which were collected in connection with the various phases of the 1935 Census of Business; employment and pay roll data, compiled from the results of the Biennial Census of Manufactures for 1935; and data on farm personnel from the reports of the 1935 Census of Agriculture. Proprietorship data for unincorporated manufacturing establishments covered by the Census of Manufactures, and for unincorporated mines and quarries, are not included. No data are available on compensation of farm personnel by counties. As an aid in the use of the county employment and pay roll data contained in the following tables, population statistics for 1930 and farm population statistics for 1930 and 1935 by counties, are presented in Table 3.

While the primary purpose of this report is to present as much information on employment and pay roll by counties as is available and to show the relative importance of counties from the standpoint of both employment and pay roll, it must be borne in mind that certain phases of business and other activities which provide employment, are not included in this report because of lack of information on the extent of employment and pay roll by counties for these fields. More important among these are domestic services, professional services, educational institutions, transportation (except motor bus and trucking), communications (telephone and telegraph), public services (federal, State, county, and municipal), public utilities (central electric light and power stations), commercial fishing, forestry, institutions (prisons, reformatories, hospitals, etc.), religious and charitable organizations, and boarding and lodging houses. Furthermore, aside from the fact that no data on compensation of proprietors and farm personnel are included in this report, the pay roll data presented are limited in their use as an index of purchasing power by counties, since it does not take into

account the income from privately invested capital. Just what amount of influence the missing elements in personnel and purchasing power have in the relative importance of counties as presented in Tables 4 and 5 cannot be determined from available information. Undoubtedly, however, the rank of some counties would change were the picture of employment and purchasing power entirely complete.

Establishments in the forty-eight States and the District of Columbia were canvassed in connection with the Census of Business and the Census of Manufactures during the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported in practically all cases. In some instances, however, reports cover the fiscal rather than the calendar year. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation. The canvass for the Census of Agriculture was conducted during the year 1935. Farm personnel was reported as of the first week of January 1935.

For complete information concerning the Censuses of Industry, Business, and Agriculture, reference should be made to the report on Manufactures, 1935, to the separate reports on individual phases of the 1935 Census of Business, and to the reports on Agriculture, 1935.

DEFINITIONS OF TERMS

PERSONNEL.---Total personnel in industry and business includes all paid employees, and active proprietors of unincorporated businesses, other than proprietors of unincorporated manufacturing establishments covered by the Census of Manufactures and proprietors of unincorporated mines and quarries. Farm personnel consists of farm operators and farm hired help. Members of proprietors' and farm operators' families who are not receiving stated wages are not considered personnel in any case.

EMPLOYEES.---For most fields in the Census of Business the number of employees is presented on the following basis: "The number of employees working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year (full-time and part-time combined) represents a total of the reported employment for these twelve months, divided by twelve."

Descriptions of the methods of arriving at the employment in those fields of business where the method deviated from the above are given in "Descriptions of Classifications" following.

In addition to wage earners, employees include office and clerical employees, selling employees, salaried officers of corporations, other executives, etc.

PAY ROLL.---Pay roll represents the salaries, wages, bonuses, and commissions, paid employees during the year. It does not include compensation of proprietors and firm members.

PROPRIETORS.---Only those proprietors and firm members devoting the major portion of their time to the business are included. Members of proprietors' families who are actively employed in, and who devoted the major portion of their time to the business, are not included as proprietors unless they actually owned an interest in the business. Those family members (other than proprietors) receiving a stated wage are considered employees. The inquiry on proprietorship does not, of course, apply to incorporated businesses.

FARMS.---A "farm", for census purposes, is all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. A ranch, nursery, greenhouse, hatchery, feed lot, or apiary is considered a farm. Establishments keeping fur-bearing animals or game, fish hatcheries, stock -yards, parks, etc., are not considered as farms, unless combined with farm operations.

The enumerator was instructed not to report as a farm any tract of land of less than three acres, unless its agricultural products in 1934 were valued at $250 or more.

A farm may consist of a single tract of land, or of a number of separate tracts. These several tracts may be held under different tenures, as when one tract is owned by the farmer and another tract is rented by him. When a land owner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm. Thus on a plantation the land operated by each cropper or tenant was reported as a separate farm. The land operated by the owner or manager, by means of wage hands, was likewise reported as a separate farm.

FARM OPERATORS.--A "farm operator", according to the census definition, is a person who operates a farm, either performing the labor himself, or directly supervising it. Therefore, the number of farm operators is identical with the number of farms.

FARM HIRED HELP.--Includes monthly, day, and piece work hands, and members of operators' families who received wages for working the equivalent of two or more days during the week beginning January 1, 1935.

BUSINESS ESTABLISHMENTS.--The Census of Business was conducted entirely on an establishment basis--that is, only recognized places of business were canvassed. An individual's residence was considered a place of business if a sign indicated that the occupant was conducting a business. Units of chains, as well as concessions operating independently in connection with other businesses, were classified as separate establishments.

POPULATION - 1930.--Represents the enumeration of the population as of April 1, 1930.

FARM POPULATION - 1930 AND 1935.--Consists of all persons living on farms, without regard to occupation. The 1930 Census was enumerated as of April 1, 1930, and the 1935 Census as of January 1, 1935.

DESCRIPTIONS OF CLASSIFICATIONS

MANUFACTURES:

Scope.--The Census of Manufactures is limited, in the main, to factory industries. It does not cover the so-called hand and neighborhood industries in which little or no power machinery is used (carpentering, blacksmithing, etc.), but does include, in addition to all manufacturing industries proper, a few industries, such as printing and publishing, whose activities are not manufacturing in the sense in which the term is generally understood. No data are collected in connection with the Census Manufactures from establishments with products valued at less than $5,000, nor are establishments engaged primarily in the performance of work for individual customers, such as custom tailor shops, dressmaking and millinery shops repair shops (except railroad repair shops), etc., canvassed as manufacturing establishments. Also excluded from the Census of Manufactures are the following: Establishments in the building industries, other than those manufacturing building materials for the general trade; cotton ginneries; custom sawmills; small grain mills (grist mills) engaged exclusively in custom grinding; wholesale and retail stores which incidentally manufacture on a small scale; and educational, eleemosynary, and penal institutions engaged in manufacturing.

The following broad groupings of the three hundred and forty separate industries recognized by the Census give some conception of the scope of the Census of Manufactures:

Food and kindred products
Textiles and their products
Forest products
Paper and allied products
Printing, publishing, and allied industries
Chemicals and allied products
Products of petroleum and coal
Rubber products
Leather and its manufactures
Stone, clay, and glass products
Iron and steel and their products, not including machinery
Nonferrous metals and their products
Machinery, not including transportation equipment
Transportation equipment, air land, and water
Railroad repair shops
Miscellaneous industries

Employees.--The figures for salaried officers and employees cover salaried corporation officers, supervisory and technical employees, and clerical employees, and represent, in general, the numbers employed during the week ending December 14, 1935. The number of wage earners in manufacturing establishments obtained by the method already explained under Definitions of Terms, data for this type of employee having been reported for each of the twelve months of 1935.

The employment and pay roll figures presented for Manufactures do not include data for employees of manufacturing plants who are engaged in distribution rather than in production activities -- except for those officers and employees engaged in both activities who were reported as production employees to the Census of Manufactures. Only United States totals are available on the number and compensation of distribution employees, as distinguished from employees reported as engaged in production activities; such totals are presented in Table 1.

Proprietors and Firm Members.--It was not possible to include in this report data on proprietors or firm members of unincorporated manufacturing establishments. The number of such proprietors and firm members in 1935, will, however, be included in the report of the Biennial Census of Manufactures which has not as yet been published.

Coverage.--Manufacturing establishments which were active in 1935 but were not accounted for in the Manufactures Census canvass were negligible in number and of little or no industrial importance.

Legal Authority.--The Biennial Census of Manufactures is authorized by Section 17 of the Fifteenth Census Act.

RETAIL DISTRIBUTION:

Scope.--Retail Distribution, for census purposes, covers the entire process of purveying goods to ultimate consumers for consumption or utilization, together with services incidental to the sale of goods. The distinguishing characteristic of the retailer is that the business is done in a retail manner, in a place of business open to the general public.

Kind of Business.--The Retail field, for census purposes, has been divided into eleven major business groups, which in turn represent a broad grouping of the sixty-six kinds of business classified separately by the Census. These eleven major groups are as follows:

Food stores
Eating and drinking places
General stores (with food)
General merchandise group (department stores, variety stores, etc.)
Apparel group
Automotive group (except filling stations) - (motor vehicle dealers, garages, etc.)
Filling stations
Furniture-household-radio group
Lumber-building-hardware group
Drug stores
Other stores group (florist, fuel and ice dealers, book stores, cigar stores and stands, jewelry stores, etc.)

Retail and Service.--The principal followed in distinguishing between retail and service business was that businesses which reported receipts from services in excess of receipts from the sale of merchandise

were classified in their entirety in the Service Census; whereas those showing receipts from services in lesser dollar value than sales of merchandise were classified in their entirety in the Retail Census.

Retail and Wholesale.--As in the case of establishments combining a retail and service activity, the line of separation between establishments doing both a retail and a wholesale business was drawn at fifty per cent. Only those stores whose sales at retail exceeded fifty per cent of total sales were classified as retail establishments. Borderline cases occurred most frequently in the distribution of hardware, farm implements, building materials, coal, office and store equipment, motor vehicles, and gasoline.

Because of the nature of the business - distribution to industrial users - and regardless of the manner in which the sales are made, supply houses, including barbers' supplies, and dental supplies, have been included in the wholesale rather than in the retail census. So, too, have most machinery dealers (except farm-implement dealers) and dealers in iron and steel products, leather and findings, and junk.

Retail and Manufactures.--In general, the principal was followed of classifying all establishments engaged both in manufacturing and in selling at retail, as manufacturing plants when the value of their products exceeded $5,000.

Coverage.--There were scattered instances of incomplete coverage in the Retail Census due largely to the absence of legislation which in regular census years makes reporting mandatory. Such incompleteness was particularly pronounced in parts of Colorado and especially in the city of Denver.

WHOLESALE DISTRIBUTION:

Scope.--The Wholesale Census includes places of business engaged primarily in selling, or acting as agents in purchasing or selling, goods at wholesale - that is, in selling goods to retailers, institutions, industrial users, and other wholesale organizations, for resale or other processing, rather than for personal or household consumption. In addition to the conventional type of wholesale merchant or jobber, it includes manufacturers' sales branches and offices located apart from plants, agents and brokers with established places of business, petroleum bulk tank stations, and assemblers of farm products. Wholesaler-retailers are included if more than half of their business is at wholesale. The Census figures do not include peddlers or others selling at wholesale without recognizable places of business.

Types of Operation.--Wholesale establishments were classified, for Census purposes, into six major type-groups comprising, in all, thirty-three different types of operation. Establishments engaged in more than one type of operation were classified according to their major activity in 1935. For the purpose of affording some conception of the

scope of the wholesale field as covered by the Census the plan of classification followed is given below.

Full-Service and Limited-function Wholesalers
- Wholesale merchants
- Voluntary group wholesalers
- Converters
- Exporters
- Importers
- Industrial distributors
- Cash-and-carry wholesalers
- Drop shippers or desk jobbers
- Mail-order or catalog wholesalers
- Retail-cooperative warehouses
- Wagon distributors

Manufacturers' Sales Branches (with stocks)

Manufacturers' Sales Offices (without stocks)

Bulk Tank Stations (Petroleum)
- Independent stations
- Chain-operated stations
- Commission Stations

Agents and Brokers (Functional Middlemen)
- Auction companies
- Brokers
- Commission merchants
- Export agents
- Import agents
- Manufacturers' agents
- Selling agents
- Other agents

Assemblers
- Country buyers of farm products
- Cream stations
- Cooperative marketing associations
- Elevators (grain)
- Packers and shippers

Coverage.--Due to the absence of legislation, which during regular census years makes reporting mandatory, the wholesale figures presented are affected slightly by incomplete coverage. In addition to a few scattered concerns elsewhere which failed to cooperate, the Census Bureau was unable to obtain complete coverage in certain areas, particularly in parts of Colorado, Nebraska, and Missouri.

INSURANCE, REAL ESTATE, AND FINANCE:

INSURANCE CARRIERS - HOME OFFICES.--Includes the home office personnel and pay roll of stock, mutual and participating stock companies; hospitalization societies; and burial societies maintaining business establishments and employing personnel. Although all types of insurance coverage are included, employment and pay roll data for companies reporting title insurance or the guarantee of mortgages a their principal insurance activity are included in the "Service" or "Finance" fields, respectively. State Funds were omitted for the reason that they are, in part at least, government rather than private enterprises. The personnel and pay roll of managing agencies for insurance carriers, and of attorneys-in-fact for reciprocal exchanges and Lloyds Associations are included

under Insurance Agencies and Brokerage Offices rather than in the figures for Insurance Carrier Home Offices.

INSURANCE CARRIERS - BRANCH OFFICES.--Includes all offices (except branches of fraternal societies) considered branch, departmental, or managerial offices by the various carriers submitting reports. Nursing offices, loan offices, real estate offices, etc., maintained and reported by carriers, are included in addition to insurance branch offices in the narrower sense of the term. Information as to the number of office solicitors in branch offices was not reported for each of the twelve months of 1935; and there is some reason to believe that because of the failure of the branch office report form to request specifically the average number of office solicitors for the year, occasionally, a specific and somewhat unrepresentative date was chosen for reporting this item.

A few insurance carriers found it necessary to report their branch office operations on a state-wide basis, together with an indication of the number of offices covered by each consolidated report. Reference should be made to table 6, page 160, which summarizes, by States, branch office employment and pay roll data which could not be segregated according to counties.

INSURANCE AGENCIES AND BROKERGE OFFICES.--Includes insurance agencies, sub-agencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds associations and for reciprocal exchanges; and underwriter agencies.

INSURANCE AND REAL ESTATE OFFICES.--Includes agencies and brokerage offices which reported that during 1935 they conducted both an insurance and a real estate business.

REAL ESTATE AGENCIES.--Only offices whose income consists principally of commissions and fees derived from such activities as real estate sales, real estate rentals, real estate management, appraisals, etc., are included. Establishments engaged primarily in buying and selling real estate in their own name are not covered. Also excluded are rental offices maintained in connection with properties which are owned by the interests maintaining such offices. Real estate agencies engaged in the management of real estate were requested to exclude from their real estate reports employees directly engaged in the operation of buildings which they managed (janitors, firemen, elevator operators, etc.).

BANKS.--Includes the following: national banks, State banks, private banks, mutual savings banks, industrial banks (including Morris Plan), Federal Reserve Banks, joint stock land banks, and foreign banking agencies. The statistics presented for banks are based on information collected by the Federal Reserve Board, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation as well as on information collected in the field canvass conducted in connection with the 1935 Census of Business.

The number of bank employees shown in Table 1 represents the number on the pay roll nearest December 15, 1935, rather than the average number of employees for the year.

FINANCIAL INSTITUTIONS OTHER THAN BANKS.--Among the kinds of institutions covered by this phase of the Census are security brokers and dealers; building and loan associations; mortgage and farm mortgage companies; installment finance companies; and personal finance companies. Also included are a miscellaneous group of institutions which could not be classified separately because of extreme incompletenesses in coverage (commercial paper houses, foreign exchange brokers, bank clearing houses, commodity exchange, mortgage guarantee companies, etc).

Employment and pay roll data on building and loan associations, in addition to that collected in connection with the field canvass of the 1935 Census of Business, were supplied by the Federal Home Loan Bank Board and the Department of Banking of the State of Pennsylvania.

The employees of financial institutions other than banks were reported only as of the pay period ending nearest December 15, 1935, and not as of a similar pay period for each of the twelve months during the year.

Coverage.--With the exception of employment and pay roll statistics for several insurance carriers from which no reports could be secured, a careful check of available sources of insurance information discloses that the home office and branch office data presented represent virtually a complete coverage of both these fields. Study of the financial statements of the several carriers which failed to submit reports indicates that no serious understatement has been caused as a result of these several omissions.

There appears to be no way of determining the degree of completeness obtained in the canvass of insurance agencies and brokerage offices, insurance and real estate offices, and real estate agencies, although it is definitely known that enumerators failed to secure reports for a number of establishments as a result of the voluntary basis on which the 1935 Census of Business was conducted. For this reason, the data presented for these three types of establishments in the Census of Business reports on Insurance and Real Estate Agencies are presented on a "number of establishments reporting" basis rather than on a census basis.

The employment and pay roll figures presented for banks include all banks actively engaged in the banking business during 1935, with the exception of twenty banks and three foreign bank agencies from which no reports could be obtained.

In contrast to the virtually complete coverage of banks, the information presented for financial institutions other than banks must in no way be construed as representing a complete coverage of establishments falling within this field. For various reasons - the absence of legislation which during regular census years makes reporting mandatory, the

difficulty experienced by enumerators in identifying establishments subject to canvass, and other obstacles usually encountered in a first survey - the figures presented must be regarded as representing only a partial summary of the contribution by the non-banking financial institutions to the employment given and pay rolls distributed by the business system of the country.

MINES AND QUARRIES:

Scope.--All mining and quarrying industries other than sulphur and pyrite are covered--anthracite and bituminous coal; gold, silver, copper, lead and zinc; iron ore; bauxite; the minor metals; stone quarrying (limestone, sandstone, granite, basalt, marble, slate, and miscellaneous stone); the production of sand and gravel; the production of salt from brine wells and underground mines; phosphate rock, clay, gypsum, magnesite, rock asphalt, and other miscellaneous minerals of the non-metallic group; and the production of petroleum, natural gas, and natural gasoline. The production of sulphur and pyrite, which was not included in the 1935 canvass, employed in 1929 a total of 2,505 employees.

Data pertaining to milling processes, commonly considered as belonging to mineral extraction and performed at or near the mines, are included in the statistics for the several mineral industries. These associated processes include milling or concentration by crushing, grinding, washing, drying, air separation, flotation, amalgamation, and sintering. The returns include finishing mills associated with stone quarrying when operated by the quarry company. They exclude the smelting and refining of metallic ores, the burning of lime, cement, and clay products, the manufacture of coke, and the refining of petroleum, which were classified at the Census as branches of manufacturing. Quarries operated directly by cement mills or lime plants solely for their own supply are excluded.

Developement work is included in the returns wherever conducted by producing mines. Non-producing enterprises, entirely in the stage of development, were canvassed in the metal-mining districts, where the devaluation of the dollar had stimulated many new mines and prospects. In the non-metallic and fuel industries, non-producing enterprises were not included.

Governmental, penal, and eleemosynary institutions engaged in mining or quarrying reported their production at the Census but not their employment, with the single exception of coal mines. Coal mines in this class reported the number of workers, and reported pay rolls where wages were in fact paid. No data on compensation, however, were obtained for the five mines operated with convict labor in Leavenworth County, Kansas, Morgan County, Tennessee, and Marshall and Taylor Counties, West Virginia.

Employment and pay roll data by counties are not presented for the petroleum or natural gas industries, nor were county data always available in the case of the stone-quarrying industries or, to lesser extent, in the case of the metal-mining industries. Reference should be made to Table 7, page 160, for a summary by States of mining and quarrying employment and pay roll which could not be segregated according to counties.

Employees.--In certain branches of mining, a considerable part of the work is done by contractors. At previous Censuses while a record of payments under contract had been obtained, no data on the number of persons employed by contractors were available. The 1935 canvass of mines and quarries obtained data on the number and compensation of the employees of such contractors in the mining of non-ferrous metals, and in the mining of coal by stripping or opencut methods. Data were also collected on employees and wages paid by contract drillers in the petroleum industry, but the tabulations have not been completed in time for inclusion in the present report. No data were obtained on the employees of contractors in the quarrying and non-metallic mineral industries, as in these industries the use of the contracting system is exceptional, and the subject did not justify investigation.

The number of wage earners was reported for each month of 1935 at the week or pay period nearest the 15th of the month, and the average number for the year was computed by dividing the monthly totals for the industry by twelve, as described under "Explanation of Terms". It should be noted, however, that in some branches of mineral extraction, especially coal mining, mines frequently shut down for an entire pay period, and the inclusion of such shut-down periods often depresses the twelve-month average substantially below the number of men actually engaged in the industry.

The returns of salaried employees for mines and quarries are exclusive of personnel at central administrative offices and, in most instances, relate only to salaried employees at the mines or in offices directly associated therewith. The figures represent the number of such employees as of December 14, or as of some other representative date.

Proprietors and Firm Members.--In the returns for mines and quarries in 1935, proprietors or firm members of very small unincorporated enterprises, such as metal-mining prospects or the wagon mines of the bituminous coal fields, were generally included either among the salaried employees or the wage earners, as the great majority of such persons were known to be engaged in manual labor. For this reason it has seemed more consistent in the data for mines and quarries to include the small number of proprietors and firm members of larger unincorporated enterprises along with the figures of total employees in this report.

Coverage.--The returns on employment and pay rolls were obtained from supplementary inquiries carried on the annual production schedules of the Bureau of Mines. The Bureau's canvass of production as usual attained a high degree of accuracy and completeness, and supplementary data were obtained, sometimes partly by estimate, for substantially all mines and quarries known to have produced mineral in 1935. Every effort was made, also, to secure returns from all non-producing enterprises engaged only in development work in metal mining, where such type of operation was known to be important in 1935. There were, nevertheless, some non-producing mines in which contact with operators was not effected, either by mail or by field canvass, due to isolated location, intermittent activity, or other cause.

SERVICE:

Scope.--The Service field consists of a heterogeneous group of kinds of business, whose common characteristic lies in the fact that they are primarily engaged in the sale of service, as distinguished from establishments dealing in merchandise (Wholesale, Retail, and Manufactures). However, it must be remembered that several major service fields (professional, educational, etc.) are not covered by this report (see page 1). Service businesses reporting total receipts of less than $100 for a full year's operation likewise are not covered in the employment and pay roll data presented.

For Census purposes, service establishments were classified into four major groups as follows:

Personal service establishments (barber shops, beauty parlors, photographic studios, etc.)

Business service establishments (bill-board advertising agencies, dental laboratories, employment agencies, sign painting shops, etc.)

Repair services and custom industries:
- Automotive repairs and services (excluding general repair garages) - (automobile paint shops, automobile top and body repair shops, battery and ignition repair shops, tire repair shops, etc.)
- Other repair services (blacksmith shops; radio repair shops; watch, clock, and jewelry repair shops, etc.)
- Custom industries (cabinet making shops, gristmills, small plants manufacturing products valued at less than $5,000, etc.)

Miscellaneous services (commercial mounting and finishing establishments, typewriter rental shops, livery stables, etc.)

In all, more than 3,000 individual kinds of service businesses are represented by these four broad classifications. As already explained under Retail Distribution, establishments conducting both a service and a retail business were classified in their entirety as retail stores rather than as service businesses whenever such establishments showed receipts from services in lesser dollar value than receipts from sales of merchandise.

Coverage.--Although irregularities and deficiencies in coverage are known to have been more pronounced in certain kinds of business classifications than in others, the employment and pay roll data presented in this volume are believed to represent a fairly complete coverage of the Service field as a whole. As is the case with other phases of the Census of Business, however, the absence of legislation which, during regular Census years makes reporting mandatory, is undoubtedly responsible for some incompleteness in certain areas.

CONSTRUCTION:

Scope.--The Construction phase of the 1935 Census of Business cover the activities of general contractors, operative builders, and special trade contractors. Establishments engaged in two or more kinds of business were included in the Construction Census, if their 1935 gross receipts from construction exceeded their 1935 operating receipts from other sources (Retail, Service, Manufactures, etc.).

Construction reports, in addition to including central and branch office activities (estimating, bidding, selling, etc.) also covered operations at the site of construction (including field or job offices maintained at the site) as well as those at yards operated by the establishment for the storage and repair of equipment.

In addition to the work performed by general contractors, operative builder, and special trade contractors, construction is also executed by force account, that is: by the employees of other than contractors. A large amount of force account work is ordinarily done by Federal, State, county, township, and municipal governments; public utilities; and manufacturing organizations. The concept of force account work could also be logically extended to include the construction work performed by farmers and householders with or without the assistance of an odd job man. That there is a considerable volume of work in this category is evident from the direct-to-user sales of construction material and equipment by mail-order and other establishments. Obviously, since the Census of Business did not cover governmental agencies, and since establishments, for Census purposes, were classified on the basis of the major activity performed, it was impossible to include in the construction figures data for construction done by force account.

Employees.--It must be borne in mind that all construction personnel was reported in accordance with the location of the contracting establishment, which may be different from the location of the construction projects, and hence from the location of employment.

Coverage.--A mail canvass was made in connection with the Census of the construction industry to supplement the canvass conducted in the field. To the report forms sent by mail, a 25% response was received. Among these were replies of many large establishments from which construction reports had not previously been received. It seems reasonable to assume, therefore, that among the 75% of the establishments which did not respond to the mail canvass, were many which had not been covered by the field enumeration.

HOTELS:

Scope.-This phase of the Census of Business includes, principally, establishments designating themselves as hotels and providing hotel accommodations as their major business activity. However, establishments reporting a total of less than six guest rooms, or receipts from room

rentals amounting to less than $500 for a full years operation, are not covered. Apartment hotels were canvassed and classified as hotels, provided a substantial portion of their receipts was derived from the accommodation of transient guests. Apartment houses, residential hotels catering exclusively to permanent guests, boarding houses, lodging houses, tourist homes or camps, resorts, Y.M.C.A.'s, Y.W.C.A.'s, dude ranches, club dormitories, and other similar establishments furnishing lodging and/or meals to guests, are not considered hotels for Census purposes. Hotels having six or more guest rooms but failing to report separately the amount of income from room rentals, were not omitted unless total receipts amounted to less than $500.

Coverage.---It is believed that the coverage of hotels, particularly those which are normally operated for only a part of the year, was somewhat incomplete. Many seasonal hotels were not operating at the time the field canvass was made, and for this reason enumerators were, in some instances, unable to secure reports. The voluntary basis on which the Census was conducted is another reason for incompleteness in coverage of both year-round and seasonal hotels in certain localities. A check of the Census data with current hotel directories and other sources cannot be entirely conclusive because of local differences in the meaning of the designation "hotel". Such a check suggests, nevertheless, that the employment and pay roll represented by hotels from which no reports were obtained, constitutes only a very small proportion of the total amount of hotel employment and pay roll for the country as a whole.

MISCELLANEOUS:

PLACES OF AMUSEMENT.--Only recognizable places of amusement charging admission or receiving fees for the use of recreational facilities are covered. Moreover, in order to be classified as a place of amusement, an establishment must have been primarily engaged in providing amusement or recreational facilities - that is, fifty per cent or more of the total operating revenue of the establishment must have been derived from this activity. A combined report for an amusement enterprise and the buildings or grounds within which the enterprise is located, was accepted only when both were being operated together as a single unit. Otherwise, separate reports were secured on different schedule forms for amusement enterprises and for the buildings or grounds within which the same were being conducted on a lease, rental, or concession basis. The data for such buildings and grounds are not included in the amusement figures presented. Also excluded are data for enterprises showing total receipts of less than $100 for a full year's operation.

It is definitely known that the coverage of places of amusement is seriously incomplete. This incompleteness is due primarily to the absence of legislation which during regular Census years makes reporting mandatory. It arises also from the difficulty of securing reports from many seasonal and transient amusement enterprises which were not in operation at the time the canvass was made. Finally, the nature of some amusement enterprises and of the business which they conduct is

such that it was difficult for the enumerator to make the contacts necessary to secure reports.

MOTOR TRUCKING FOR HIRE.--The Census of Motor Trucking for Hire was limited to those concerns maintaining a recognizable place of business and receiving fifty per cent or more of their 1935 revenue from the transportation of other peoples' goods for a price.

In the Census of Business report entitled "Motor Trucking for Hire" data are presented on a concern rather than on an establishment basis - that is, figures given for a particular State or region represent the total revenue, employment, expenses, etc. of concerns with headquarters in such area. For purposes of this report, however, employment and pay roll data for all units of motor trucking establishments located apart from the headquarters offices of such establishments have been assigned to those counties wherein the respective units are located.

There is no way of determining the degree of completeness of this phase of the Census of Business. While it is felt that most of the larger for-hire trucking operators reported to the Census, it is definitely known that there is some incompleteness, and that such incompleteness is greater in certain areas than in others.

MOTOR BUS TRANSPORTATION.--Include only those concern deriving the major portion of their operating revenue from regular common carrier bus transportation operation. Concerns whose primary business is the operation of sightseeing or chartered buses, limousines, taxis, or jitneys, are not included, since many such concerns do not maintain a recognizable place of business. Also excluded are bus lines operated by municipalities, by electric railway companies or their subidiaries, or directly by steam railroads.

For purposes of this report, employment and pay roll data for all units of bus concerns which are located apart from the home offices of such concerns have been assigned to the counties wherein the respective units (garages, terminals, repair shops, branch offices, etc.) are located. Since, in the Census of Business report entitled "Motor Bus Transportation", the procedure was followed in the data presented by geographic regions of allocating all business of a concern to the region in which its home office was located, there will necessarily be some disagreement between these region totals and the corresponding region totals obtained by addition of the State figure presented in this report.

A few concerns failed to submit reports of their bus operations, because reporting was not compulsory. The number that chose not to cooperate, however, was negligible, and it is felt that the coverage of those concerns receiving fifty per cent or more of their annual revenue from motor bus tranportation operations is reasonably complete.

PUBLIC WAREHOUSING.--Include those establishments engaged primarily in serving the public with storage facilities. Storage of goods by manufacturers, wholesalers, retailers, and service agencies in their own

or rented buildings, lofts, rooms, etc., and in connection with their regular industrial and commercial operations, was not included as a part of the Census of Public Warehousing unless the space was rented from a public warehouseman and he exercised a control over the goods stored. Also omitted from this phase of the Census are field warehouses, apple sheds, potato pits, State and municipal warehouses, open yard and wharf storage, and automobile storage.

The coverage of public warehouses is believed to be fairly complete, although a few concerns failed to submit reports because of the voluntary basis on which the Census was taken.

ADVERTISING AGENCIES.--Covers establishments that contract for space or other advertising media and place the advertising for the client on a commission or fee basis. Establishments which write advertising copy, do commercial art work, etc., but do not place advertising with media, are not included.

Of a list of 1,221 agencies compiled by the Bureau of the Census with the assistance of the American Association of Advertising Agencies, 47 definitely refused to report and 85 agencies failed to report or to furnish a reason for not reporting.

RADIO BROADCASTING.--Includes broadcast stations engaged primarily in selling time to advertisers, radio networks, and four experimental stations reporting some commercial business. Employment and pay roll data for radio networks and for experimental stations, while included in the United States totals for radio broadcasting presented in Table 1, are not included in the individual State totals for radio broadcasting presented in this same table, since such data could not be presented by States without disclosing exactly or approximately the operations of individual organizations. Stations operated on a non-commercial basis, such as those operated by schools, churches, and similar organizations, for their own and public use, are excluded from the radio broadcasting Census, as are amateur stations and those operated in connection with transportation agencies.

All but three small broadcast stations and all radio net works in operation as of December 31, 1935 are included in the Census of Radio Broadcasting.

TOURIST CAMPS.--Only those places engaged primarily in furnishing temporary lodging accommodations to tourists in cabins or other similar structures, or in furnishing camping space and other camping facilities to tourists for a fee, are included. Tourist homes furnishing temporary accommodations to motorists in private residences, tourist camps operated by communities, and cottage colonies catering to vacationists rather than to tourists, are not covered.

Although the coverage of tourist camps, as defined for Census purposes, is believed to be reasonably complete, some irregularities undoubtedly exist due both to the difficulties experienced by enumerators

in securing reports for seasonal camps not in operation at the time of canvass, and to the voluntary basis on which the Census was taken.

ADMINISTRATIVE OFFICES.--Covers only those administrative offices maintained as separate establishments in connection with the activities of multi-unit manufacturing or business organizations. The personnel and pay roll data of offices located at the same addresses as manufacturing plants reporting to the Census of Manufactures, or at the same addresses as establishments reporting to various phases of the Census of Business, were included in the statistics for those respective plants or establishments. No data are included in this report for administrative offices maintained separately from, but in connection with, mining or quarrying enterpises --- except for administrative offices of those manufacturing organizations which also own and operate mines and quarries.

OTHER MISCELLANEOUS.--Covers, in addition to the employment and pay roll data contained in the Census of Business report entitled Non-profit Organizations, Office Buildings and Miscellaneous, data for chain store warehouses (not shown separately to avoid disclosures), and those county totals within the various classifications for which data are presented in Table 1, which, if shown separately would have disclosed exactly or approximately the operations of individual organizations. The "Other Miscellaneous" State totals include, in addition, figures for radio networks and radio experimental stations. As previously explained, data for these two classifications are included in the United States totals for radio broadcasting, but, in the case of the statistics presented for individual States are combined with "Other Miscellaneous" to avoid disclosures.

The Business Census report on Non-profit Organizations, Office Buildings, and Miscellaneous, covers, more specifically, trade associations, trade unions, chambers of commerce, boards of trade, fraternal organizations, golf and country and other recreational and social clubs, civic and patriotic organizations, professional associations, research organizations, social service agencies; office buildings; cemeteries (not including church cemeteries or those controlled by municipalities or governmental units); non-municipally operated gas plants distributing purchased gas, heating plants, and water works; and professional service businesses (accountants, architects, commercial artists, engineers, etc., but not including professional businesses such as lawyers, physicians, dentists, etc.).

Due to the absence of legislation making the filing of reports mandatory and because of the difficulty encountered by enumerators in identifying and locating many of the establishments coming within the scope of this classification, there is an under-coverage in all types of establishments included. The extent of this under-coverage cannot be determined as there are no previous Census statistics for comparisons, and all types of establishments covered are so varied that there are no data available with which a comprehensive check can be made.

DESCRIPTIONS OF TABLES

TABLE 1.--Presents the number of active proprietors, number of employees, and pay roll, in industry and business, for the United States by States, separately for Manufactures and for each of the fields of the 1935 Census of Business. This table, in addition to recapitulating data presented in Tables 2, 6, and 7, shows the detail comprising the classifications "Insurance, Real Estate, and Finance" and "Miscellaneous".

TABLE 2.--Shows the number of active proprietors, number of employees, and pay roll, in industry and business, for each State by counties as well as the rank of the county within the State, based on the amount of pay roll. The information on number of employees and pay roll is presented separately for Manufactures; Retail Trade; Wholesale Trade; Insurance, Real Estate, and Finance; Mines and Quarries; Service Establishments; Construction; Hotels; and Miscellaneous, insofar as is possible without disclosing the operations of individual establishments.

TABLE 3.--This table presents the population of States and counties for 1930, the per cent of population each State and each county represents of the United States total population, and the per cent of population, each county represents of the total population of the State; farm population, 1930 and 1935; total personnel (industry, business, and farm), the per cent that this personnel in each State and each county represents of the United States total, the per cent of personnel each county represents of the State total, and the rank in State of each county based on personnel (counties representing equal percentages ranked alphabetically); personnel in industry and business, the per cent each State and each county represents of the United States total of personnel in industry and business, and the per cent each county represents of the State total; farm personnel, the per cent each State and each county represents of the United States total of farm personnel, and the per cent each county represents of the State total; number of farm operators and number of farm hired help; total pay roll in industry and business, the per cent represented by each State and each county of the United States total pay roll in industry and business, and the per cent represented by each county of the State total.

TABLE 4.--Lists those counties accounting for 75% of the personnel in industry and business and on farms in the United States according to rank in the United States, based on personnel (counties representing equal percentages ranked alphabetically). In addition, this table shows the amount of personnel, and the per cent of the United States total personnel represented by each county. This table is presented in quartiles, the total number of counties accounting for each quartile of personnel, and the total personnel in each quartile, being abstracted at the quartile intervals. The following table presents a recapitulation of this information:

23 counties account for	25.4061%	of the personnel, or	7,247,833
166 counties account for	50.0250%	of the personnel, or	14,270,982
818 counties account for	75.0065%	of the personnel, or	21,398,591
All counties account for	100.0000%	of the personnel, or	28,528,105

Table 5.---Lists those counties accounting for 75% of the pay roll in industry and business in the United States according to rank in the United States, based on amount of pay roll, (counties representing equal percentages ranked alphabetically). In addition, this table shows the amount of pay roll, and the percent of the United States total pay roll represented by each county. This table is presented in quartiles, the total number of all counties accounting for each quartile, of pay roll, and the total pay roll in each quartile, being abstracted at the quartile intervals. The following table presents a recapitulation of this information:

6 counties account for	25.9511%	of the pay roll, or	$ 5,299,745,000
34 counties account for	50.0247%	of the pay roll, or	$10,216,812,000
156 counties account for	75.0464%	of the pay roll, or	$15,327,427,000
All counties account for	100.0000%	of the pay roll, or	$20,424,969,000

Table 6.---Presents for the United States by States that portion of insurance branch office employment and pay roll which could not be segregated according to counties.

Table 7.---Presents for the United States by States that portion of employment and pay roll in mines and quarries which could not be segregated according to counties.

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500.

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous".

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500.

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous" (See definitions of classifications.) 3/ Less than $500.

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500. 4/ Average less than one.

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500.

TABLE 2.--PERSONNEL AND PAY ROLL 1/ IN INDUSTRY AND BUSINESS, BY COUNTIES: 1935

* Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500.

* Does not include active proprietors for Manufactures nor Mines and Quarries X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous" (See definitions of classifications.) 3/ Less than $500.

*Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous" (See definitions of classifications.) 3/ Less than $500.

*Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.)

TABLE 2.--PERSONNEL AND PAY ROLL 1/ IN INDUSTRY AND BUSINESS, BY COUNTIES: 1935

(Pay roll expressed in thousands of dollars. Full-time and part-time employees combined.)

*Does not include active proprietors for Manufactures nor Mines and Quarries. X Combined with "Miscellaneous" to avoid disclosing the operations of individual organizations. State totals shown for classifications in which "X's" appear exceed the addition of the county totals by the amounts which "X" indicates as having been withheld. The "Miscellaneous" State totals on the other hand, are less than the addition of the "Miscellaneous" county totals by the amounts represented by all the "X's" within the respective States, regardless of the classifications in which the "X's" appear.

1/ Does not include compensation of proprietors. (See text for full explanation.) 2/ Includes Places of Amusement, Motor Trucking for Hire, Motor Bus Transportation, Public Warehousing, Advertising Agencies, Radio Broadcasting, Tourist Camps, Chain Store Warehouses, and "Miscellaneous". (See definitions of classifications.) 3/ Less than $500. 4/ Average less than one.

TABLE 2.--PERSONNEL AND PAY ROLL 1/ IN INDUSTRY AND BUSINESS, BY COUNTIES: 1935
